EXPERIENCE

Cyber Cell, Vidisha (ASP Office), MP May 2025 – Oct 2025
Intern Developer

- Validated 150+ operational records with 100% accuracy, reducing data inconsistency errors for the department.
- Diagnosed and resolved recurring system issues, improving operational reliability by streamlining the issue-tracking workflow.

PROJECTS

Block Bazar – NFT Marketplace
github.com/Hemant-2704

- Engineered a full-stack decentralized marketplace for ERC-721 NFTs; integrated IPFS for metadata storage, cutting centralized hosting costs to zero.
- Secured smart contracts with OpenZeppelin standards and reentrancy-safe payment logic, achieving zero critical vulnerabilities in Foundry test suite.

Crowdfunding Smart Contract

- Delivered an Ethereum crowdfunding contract with automated goal validation & refund mechanisms, verified through 100% unit/fuzz test coverage using Foundry.

Grin & Earn – Blockchain Reward System

- Built a transparent on-chain reward distribution system triggered by emotion-detection outputs; used Web3.js for real-time frontend-to-blockchain event monitoring.
