SUMMARY

Recently, graduated B.Tech Computer Science (Blockchain) student with hands-on experience in blockchain development, smart contract engineering, and software development. Proficient in Solidity, Python and Web3 development technologies. Strong foundation in DSA, DBMS, OOP, and Operating Systems. Seeking Software Engineer, Blockchain Developer, or Associate Engineer roles.

TECHNICAL SKILLS

Language: Python , Solidity, C

Database: MySQL

Tools: Git, GitHub Copilot, Postman, REST APIs, API Integration, VS Code

Blockchain & Distributed Ledger

- Smart Contracts, ERC-20, ERC-721 standards
 - Foundry, Remix, Hyperledger, Hyperledger Fabric (chain code concepts, permissioned networks)
 - Ethers.js, Web3.js
 - IPFS, Layer-2 Solutions, Optimistic & ZK Sync basics
-

EXPERIENCE

Intern Developer | Cyber Cell, Vidisha (ASP Office), MP

May 2025 - Oct 2025

- Supported software development and maintenance activities, including testing, debugging, and issue resolution.
 - Verified and validated 150+ operational records to ensure data accuracy and consistency.
 - Assisted in analyzing technical issues and implementing solutions to improve system reliability.
 - Coordinated with team members during requirement collection and project execution activities.
-

PROJECTS

Block Bazar - NFT Marketplace

github.com/Hemant-2704

- Built a **decentralized NFT marketplace** supporting ERC-721 token minting, listing, purchasing, and ownership transfer.
- Integrated **IPFS** for decentralized metadata storage and **Ethers.js** for Ethereum and **Polygon** blockchain interactions
- Applied **OpenZeppelin security standards** and validated smart contract functionality through Foundry-based testing.
- Reduced security risks by implementing reentrancy-safe payment mechanisms.

Stationery Management System - Python

- Developed a **Python-based inventory management** application for tracking stationery stock and usage.
- Implemented input **validation, stock monitoring, and automated low-inventory alerts**.
- Generated **inventory history and reporting features** to improve stock management.

Crowdfunding Smart Contract

- Designed and integrated an **Ethereum-based crowdfunding smart contract** with goal validation and refund mechanisms.
- Engineered **secure fund-handling mechanisms** with **reentrancy protection** and comprehensive unit/fuzz testing using Foundry .

Grin & Earn (Blockchain)

- Developed a **blockchain-powered reward distribution system** triggered by emotion-detection outputs.
 - Utilized **smart contract logic** for transparent reward allocation and transaction tracking.
 - Utilized **Web3.js** for frontend-to-blockchain communication and real-time event monitoring.
-

EDUCATION

- **B.Tech , Computer Science (Blockchain) - SATI, Vidisha (2022–2026) | CGPA: 8.44**
 - **Carmel Convent Senior Secondary School, Bhopal, M.P.**
Class X (CBSE) | 2019-2020 Class XII (CBSE) | 2021-2022
-

CERTIFICATIONS

- Oracle Blockchain Developer Certificate Badge - Oracle University
- Solidity 101 - [Cyfrin Updraft](#)
- Full-Stack Web3 Development [Cyfrin Updraft](#)
- Privacy & Security in Online Social Media – NPTEL (IIT Hyderabad)
- [Business Intelligence & Analytics](#) – NPTEL (IIT Madras)
- [Enterprise Data Science – IBM](#)
